

Purchaser / Planner

Transfer Flow, Inc.

Chico, CA

Exciting career opportunity with the Premier provider of American-Made fuel systems!

Transfer Flow, Inc. is actively searching for an energetic self-starter to manage our supply chain, from advanced planning and scheduling through procurement. Ideal candidate will:

Forecast, maintain and procure inventory to support production goals/metrics.

Partner with Engineers to source products for new product development projects.

Negotiate high-level contracts.

Actively manage and work to reduce supplier quality issues.

Actively work projects to reduce COGS and inventory carrying costs.

Actively work projects to condense lead times.

Implement Lean manufacturing tools and methodologies to reduce costs + waste.
Example: Establish visual-based inventory systems maintained by vendors.

Provide reports to Management team as needed.

Analyze changes in the market that may affect availability or price of goods.

Create & maintain systems for tracking vendor metrics such as service levels, on-time deliveries

Transfer Flow is known as one of the area's top employers of choice for our longevity and long-standing, strong relationships built over time. Our dedication to the well-being, safety and satisfaction of our customers are in alignment with our core values of accountability, continuous improvement and taking care of one another. We offer very competitive wages and benefits.

Qualifications/Prerequisites:

- TFI requires all members of our staff to fulfill all job functions in a consistent state of alertness and work in a safe manner
